

Mail2Text

Send SMS from any e-mail Client/Application

¡As easy as send an e-mail! Mail2Text is a service that allows sending SMS – text messages to a mobile phone - from any e-mail Client/Application, Outlook, Outlook Express, etc. and public e-mail providers such as Gmail, Hotmail, etc. -

Mail2Text accept e-mails from one or more authorized email addresses and have them relayed as a text message to the cellular/mobile number indicated. Send SMS to one or multiple recipients and keep copy in your e-mail outbox as well as in the Web application.

Adaptability, flexibility and simplicity are the goals of **Mail2Text** which provides users with an easy way to send SMS, interacting with a familiar tool as is the usual e-mail application, avoiding memorizing new processes or opening other applications.

Mail2Text has been designed to also accept emails from most of the public email servers.
