

ReporText

Send SMS and get writing proof of delivery

ReporText is a service that allows you to easily and automatically obtain written confirmation and writing proof of delivery of SMS sent from the Web application 1-2-Text®.

ReporText is a fast, economical and efficient alternative for those who require an additional confirmation of the messages sent.

Communications and notifications in electronic, computing, telemetric, informative telecommunications or other in similar condition, are recognize by law in many countries provided to ensure the authenticity of the communication and its contents, and authoritative record of the transfer, reception and integration of the time it came. **ReporText** is the ideal complement for sending communications via SMS as further evidence on third parties

Options

ReporText provides writing proof of delivery for one or several text messages. It offers two simple alternatives:

- **Report of transmission:** The system send to the account administrator or other user previously assigned in the Web application, an SMS and also an email summary, with data transmission performed. Option valid for any quantity of SMS sent simultaneously
- **Proof of Delivery:** Once the report of delivery is received from the register network the mobile number belongs, the system will generate a document containing detailed information of the SMS including time of delivery and arrival. This option only allows the issuance of confirmation when sent SMS individually

Benefits of ReporText

Free: The Report of transmission is generated at no additional cost to the customer

Easy: Documents or reports are obtained with a single click

Expedite: The report is generated as soon as SMS are sent. Proof of delivery shortly after the SMS reaches its destination

Ecological: Because of its virtuality and is respectful of the environment

ReporText is aimed to:

For businesses, institutions, organizations, government or individuals who require additional evidence of the delivery of messages sent.

Frequent users of ReporText

Business: Debts recovery, notification of failures, confirmation or notification of activation and deactivations, warning of cuts in services, planned closure, incidents and complaints.

Public Administrations and Government: Notifications on taxes, administrative sanctions, competitions, biddings, calls for places of employment.

In law firms and attorneys: Notices and announcements on paperwork
